

BuroPur PB 18 V

BUROPUR® is a high-strength, high-performance non-thermoforming material. It is made with polypropylene (PP) or polyester (PE) resin, giving it a wide range of properties, making it an ideal choice for a wide range of applications. It is a high-strength, high-performance non-thermoforming material. It is made with polypropylene (PP) or polyester (PE) resin, giving it a wide range of properties, making it an ideal choice for a wide range of applications.

It is a high-strength, high-performance non-thermoforming material. It is made with polypropylene (PP) or polyester (PE) resin, giving it a wide range of properties, making it an ideal choice for a wide range of applications.

ADVANTAGES AND BENEFITS

- High strength
- High performance
- High resistance to impact and abrasion
- High resistance to heat and cold
- High resistance to chemicals
- High resistance to UV radiation
- High resistance to moisture
- High resistance to fire
- High resistance to aging
- High resistance to staining
- High resistance to odors
- High resistance to discoloration
- High resistance to mold and mildew
- High resistance to bacteria

USES

- Automotive
- Marine
- Industrial
- Medical
- Food and beverage
- Agriculture
- Construction
- Packaging
- Transportation
- Sports and recreation
- Home and office
- Art and craft
- Education
- Research and development
- Manufacturing

PRODUCT INFORMATION

BUROPUR® is a high-strength, high-performance non-thermoforming material. It is made with polypropylene (PP) or polyester (PE) resin, giving it a wide range of properties, making it an ideal choice for a wide range of applications. It is a high-strength, high-performance non-thermoforming material. It is made with polypropylene (PP) or polyester (PE) resin, giving it a wide range of properties, making it an ideal choice for a wide range of applications.

Warnings

BUROPUR® is a high-strength, high-performance non-thermoforming material. It is made with polypropylene (PP) or polyester (PE) resin, giving it a wide range of properties, making it an ideal choice for a wide range of applications. It is a high-strength, high-performance non-thermoforming material. It is made with polypropylene (PP) or polyester (PE) resin, giving it a wide range of properties, making it an ideal choice for a wide range of applications.

Technical Data

BUROPUR® is a high-strength, high-performance non-thermoforming material. It is made with polypropylene (PP) or polyester (PE) resin, giving it a wide range of properties, making it an ideal choice for a wide range of applications. It is a high-strength, high-performance non-thermoforming material. It is made with polypropylene (PP) or polyester (PE) resin, giving it a wide range of properties, making it an ideal choice for a wide range of applications.

Material Properties

BUROPUR® is a high-strength, high-performance non-thermoforming material. It is made with polypropylene (PP) or polyester (PE) resin, giving it a wide range of properties, making it an ideal choice for a wide range of applications. It is a high-strength, high-performance non-thermoforming material. It is made with polypropylene (PP) or polyester (PE) resin, giving it a wide range of properties, making it an ideal choice for a wide range of applications.

PROPERTY	UNIT	VALUE
Density	g/cm ³	0.90
Tensile strength	MPa	40-50
Elongation at break	%	10-15
Impact strength	kJ/m ²	10-15
Heat deflection temperature	°C	100-120
Chemical resistance	—	Good
UV resistance	—	Good
Flammability	—	Good
Moisture resistance	—	Good

BUROPUR® is a high-strength, high-performance non-thermoforming material. It is made with polypropylene (PP) or polyester (PE) resin, giving it a wide range of properties, making it an ideal choice for a wide range of applications. It is a high-strength, high-performance non-thermoforming material. It is made with polypropylene (PP) or polyester (PE) resin, giving it a wide range of properties, making it an ideal choice for a wide range of applications.
